# Getting Started

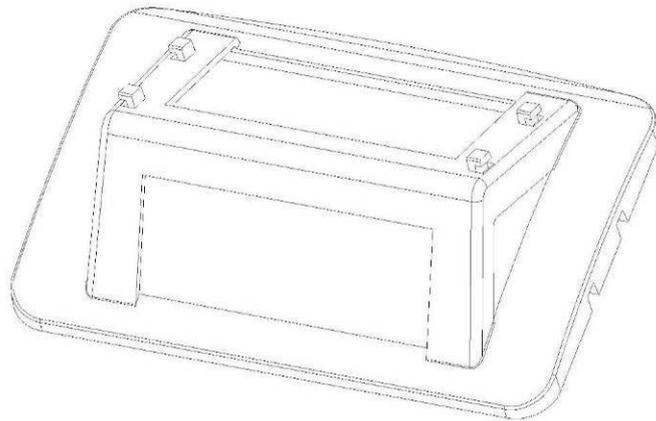

## Packing List

The package contains the following parts, please check if all the items are not missed:

1. The phone device

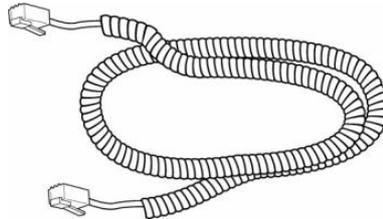

2. The footstand

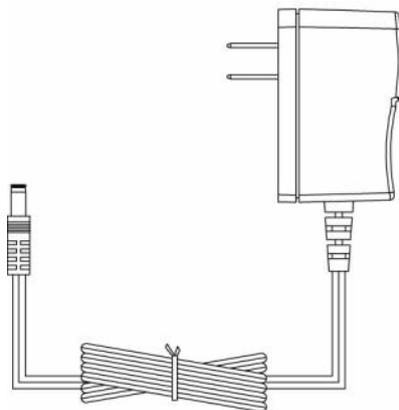

3. Handset

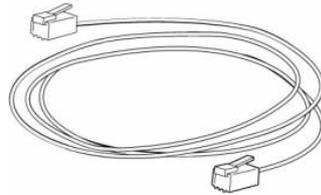

4. Headset cord

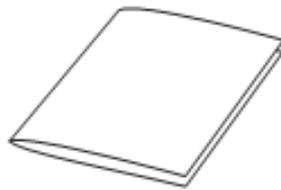

5. Power adapter

6. Ethernet cable

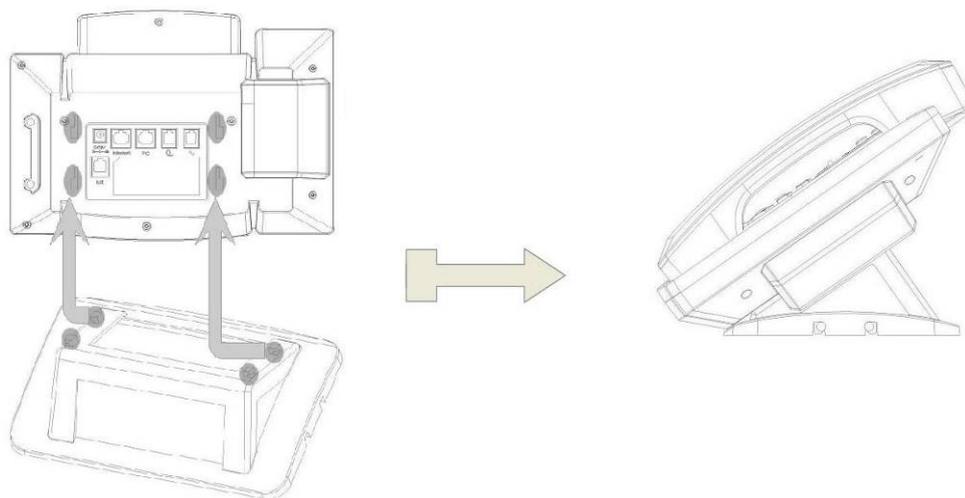

7. Quick installation reference

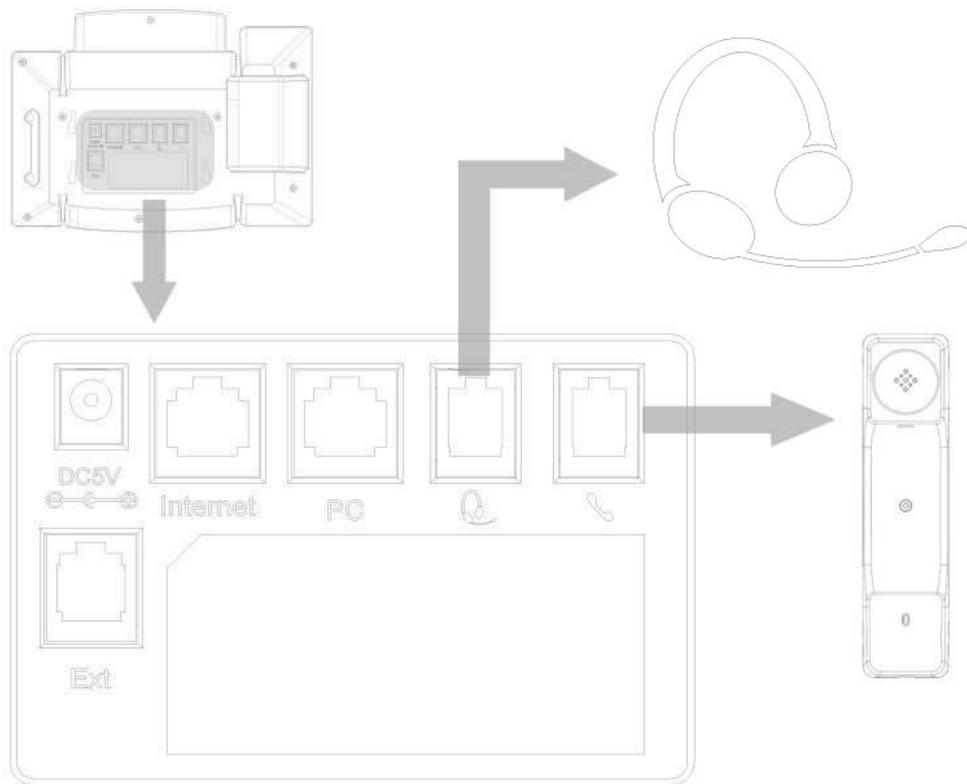

## Phone Installation

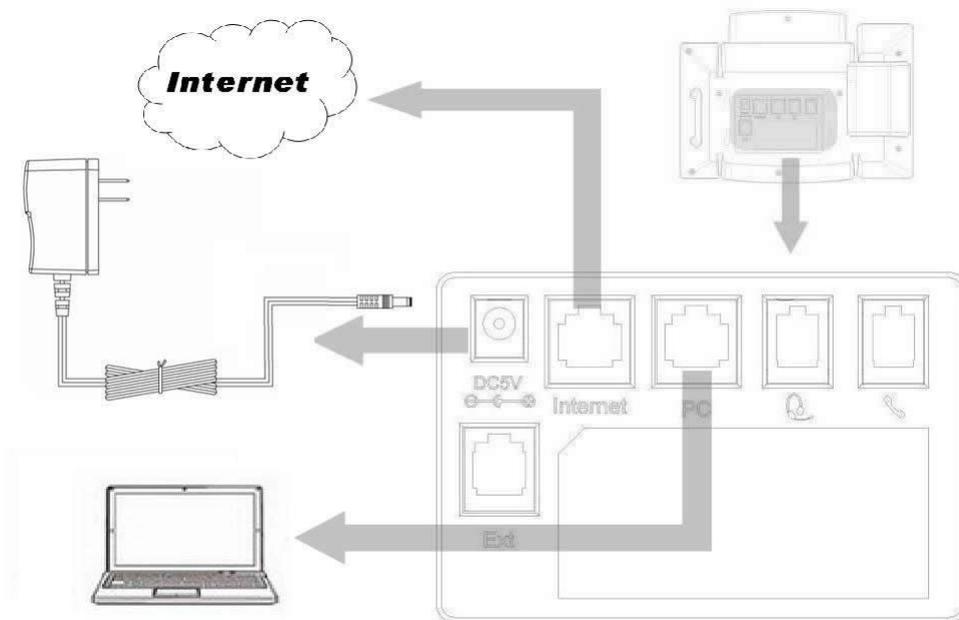

### 1. Attach the Foot stand

## 2. Connect the Handset and optional Headset

### 3. Connect the Network and Power

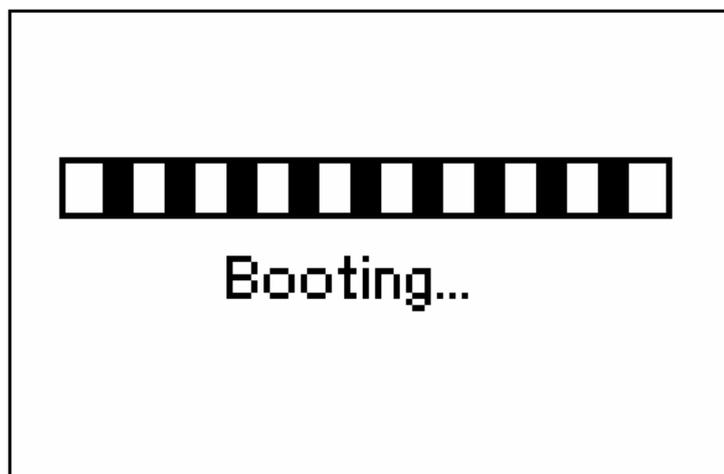

### Initialization

After your phone has been powered up, the system boots up and performs the following steps:

#### Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

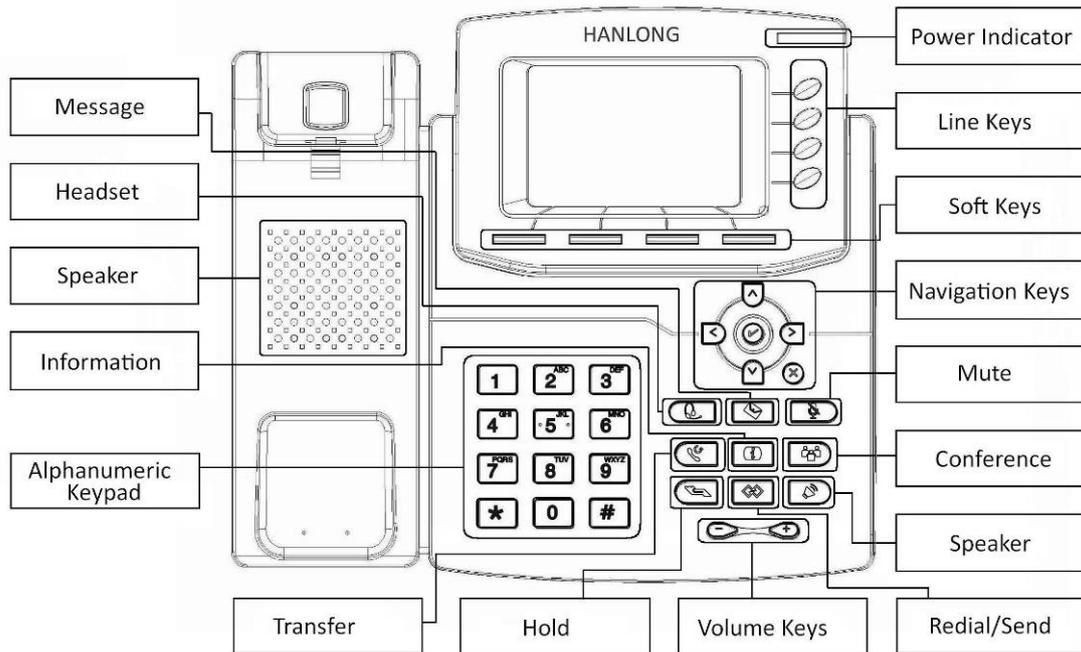

And then show “Initializing “during the initialization.

By default the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

## Basic Features Configuration

This part will mainly introduce the basic configuration as the Time, Language, and Volume...

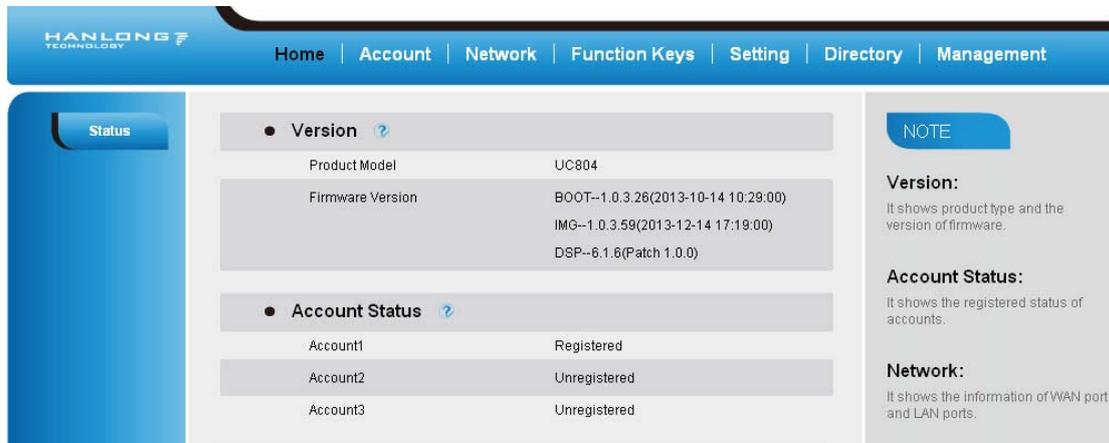

### Web Login

1. Get the IP address: Press Menu → Status → Information.

2. Input the IP Address in the web browser.
3. Input the user name (default is admin), password (default is admin).

4. Login successfully.

The screenshot shows the HANLONG web interface. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management. The main content area is divided into three sections:

- Status**: A sidebar menu on the left.
- Version**: A table showing product and firmware details.

Product Model	UC804
Firmware Version	BOOT--1.0.3.26(2013-10-14 10:29:00) IMG--1.0.3.59(2013-12-14 17:19:00) DSP--6.1.6(Patch 1.0.0)
- Account Status**: A table showing the registration status of three accounts.

Account	Status
Account1	Registered
Account2	Unregistered
Account3	Unregistered
- NOTE**: A sidebar on the right providing explanations for the Version, Account Status, and Network sections.

**Note:**

The PC and phone should be in the same segment.

When register the accounts in web and the server port is not “5060”, then “SIP Server” should be set as “SIP Server’s IP address: server port.”, for example, “192.168.0.122: 5090”.

## Administrator Password

The password is mainly used for login the web interface or set the advanced settings through phone interface. And the default password of the administrator is: **admin**

**To change to password via Phone Interface**

1. Press Menu → setting → Advanced settings → password (default admin) → Set Password
2. Enter the current PWD (password), new password and confirm the new password.
3. Press save soft key or  to save the new password.

**Set Password**

1. Current PWD: \_\_\_\_\_

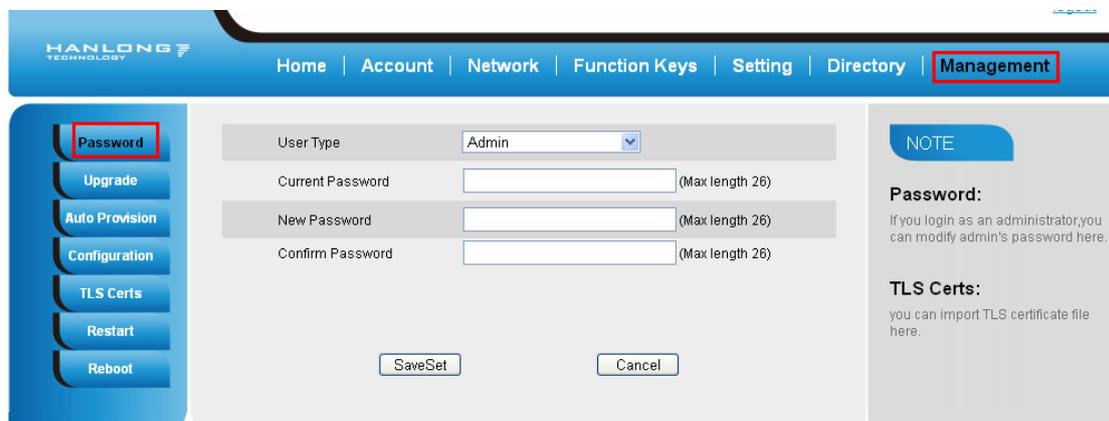

2. New PWD: \_\_\_\_\_

3. Confirm: \_\_\_\_\_

Cancel 2aB Delete Save

**To change to password via Web Interface**

1. Management → Password
2. Fill the value
3. Click  to save the configuration.

**Note:**  
When you use the web interface: **user name: admin**      **password: admin(default)**

## Language

The default Phone interface language is English.

**To change the language via Phone interface**

1. Press Menu → Setting → Basic Settings → Language.
2. Press  or Save soft key to save the configuration.

### To change the language via Web Interface

1. Setting → Preference → Web Language
2. Select the necessary one.
3. Press  to save the configuration.

#### Note:

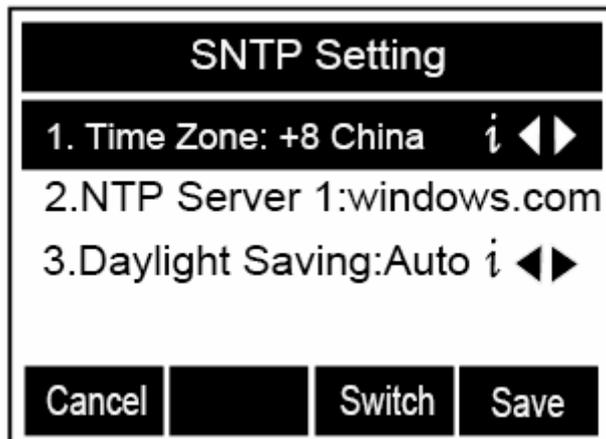

All languages may not be available for selection. The available languages depend on the language packs currently loaded to the IP phone.

## Time and Date

The time and date show on the idle page, and it can be set and change by SNTP server automatically or manual setting.

### To configure the time and Date by SNTP setting

1. To press Menu → Setting → Basic setting → Time & Date → SNTP Settings
2. Press  or , or  to change the Time zone.
3. Fill the NTP server1, NTP Server2, and Daylight Saving.
4. Press  or Save soft key to save the configuration.

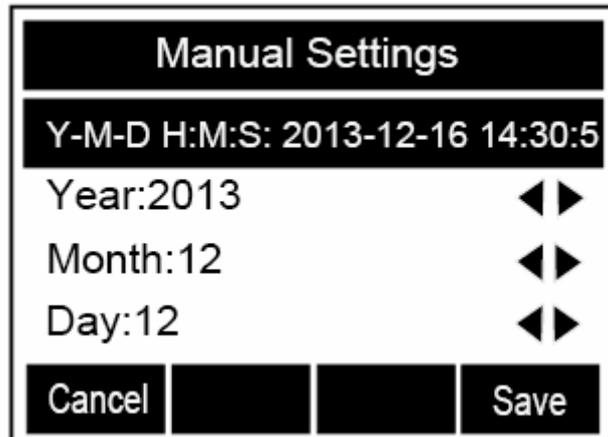

#### Note:

Press , all zone will show on the display, select the one you want and press save or confirm key to save the configuration.

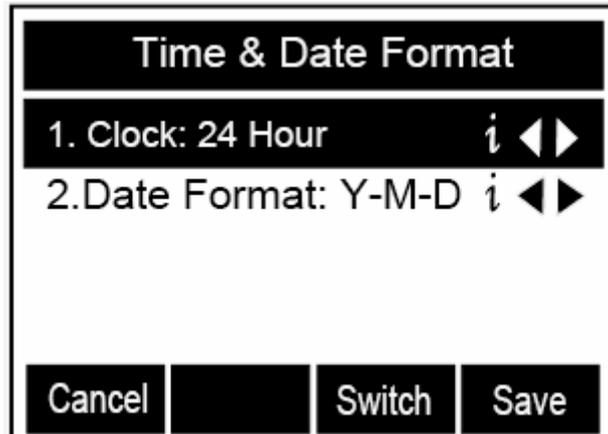

### To configure time and date manually

1. To press Menu → Setting → Basic setting → Time & Date → Manual Settings
2. Press  and  or change the right time, or you can input the right time.
3. Press  or Save soft key to save the configuration.

**To configure the Time & Date Format**

1. To press Menu → Setting → Basic setting → Time & Date Format
2. Press  and  or press  to change between 12 Hour or 24 Hour.
3. Press  and  or press  to change among Y-M-D(year-month-day), M-D-Y(month-day-year), D-M-Y(day-month-year).
4. Press  or Save soft key to save the configuration.

**To configure the DHCP time**

1. To press Menu → Setting → Basic setting → DHCP time
2. Press  and  or press  to change between Disable and Enable.
3. Press  or Save soft key to save the configuration.

**To configure the Time and Date by web interface**

1. Login  
Login name: admin, password: admin(default)
2. Network → Advanced → NTP Server
3. Fill the value in the blank.

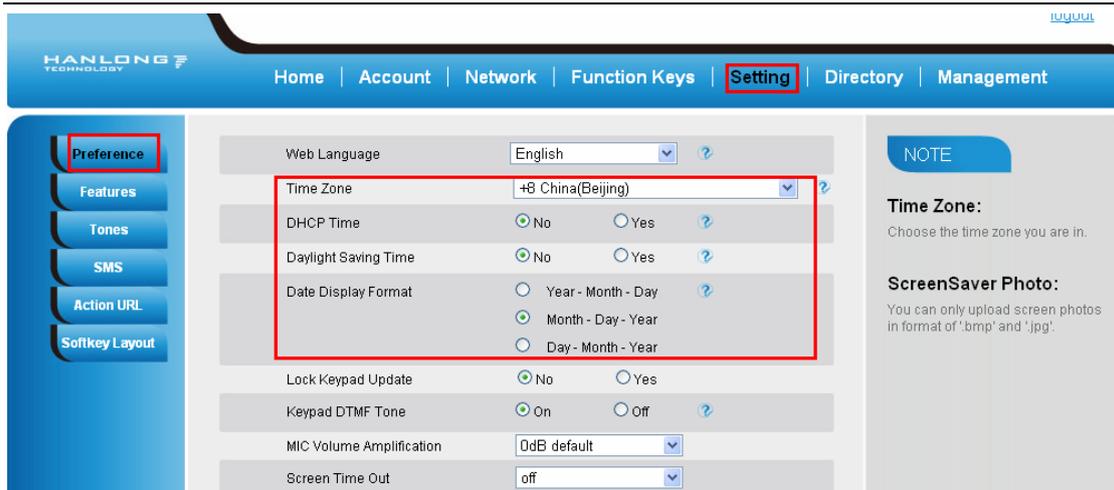

The screenshot shows the HANLONG web interface with the 'Network' menu selected. The 'Advanced' configuration tab is active, and the 'NTP Server' section is highlighted with a red box. The configuration includes:

- LLDP**: Active (Disable), Packed Interval (120)
- QoS Set**: Layer 3 QoS (48), Layer 2 QoS (802.1Q/VLAN Tag: 0), Layer 2 QoS (802.1p priority value: 0), Data VLAN Tag (0)
- NTP Server**: URI or IP address (time.windows.com), Allow DHCP Option 42 To Override NTP Server (No)
- VPN**: Active (No), Upload VPN Config (未选择文件)

A 'NOTE' section on the right explains QoS and NTP Server: 'When the network capacity is insufficient, QoS could provide priority to users by setting the value.' and 'The server which is used to synchronize the clock of the phone.'

### To change the Time Zone and Date Display Format via web interface

1. Setting → Preference → Time Zone
2. Select the necessary one.
3. Press  to save the configuration.

**Note:**

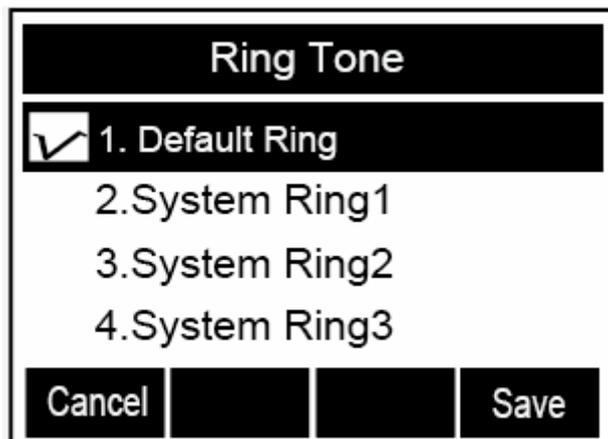

If the IP Phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, please contact your system administrator for more information.

## Ring Tone

You can adjust the type and volume of the ring tone.

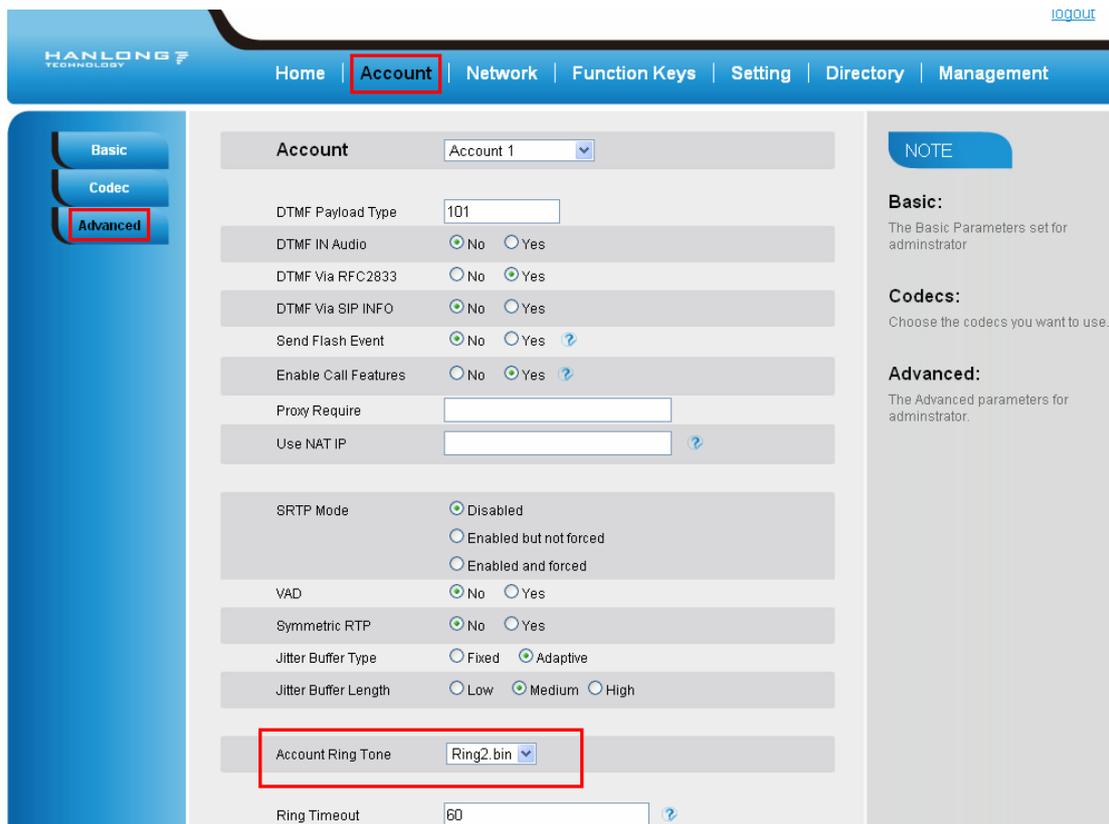

**To adjust the Ring Tone Type via Phone interface**

1. Press Menu → Setting → Basic Settings → Ring Tone.
2. Press  and  to select the aimed one.
3. Press  or Save soft key to save the configuration.

**To adjust the Ring Tone Type via Web Interface**

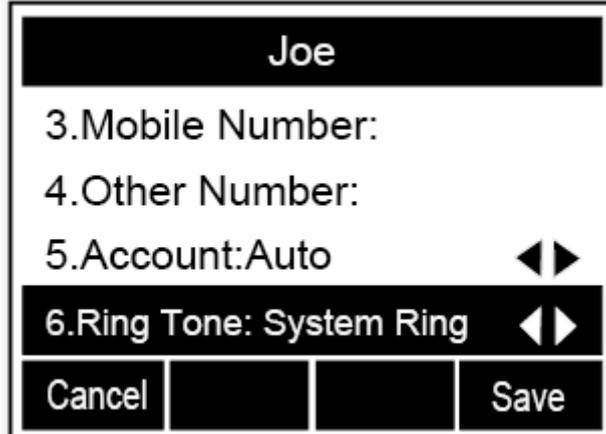

1. Account → Advanced → Account Ring Tone
2. Select the wanted one
3. Click  to save the configuration.

The screenshot shows the HANLONG web interface for configuring an account. The navigation bar includes Home, Account (highlighted), Network, Function Keys, Setting, Directory, and Management. The left sidebar has Basic, Codec, and Advanced (highlighted) tabs. The main content area is titled 'Account' and shows configuration for 'Account 1'. The 'Account Ring Tone' dropdown is highlighted with a red box and shows 'Ring2.bin' selected. Other settings include DTMF Payload Type (101), DTMF IN Audio (No), DTMF Via RFC2833 (Yes), DTMF Via SIP INFO (No), Send Flash Event (No), Enable Call Features (Yes), Proxy Require, Use NAT IP, SRTP Mode (Disabled), VAD (No), Symmetric RTP (No), Jitter Buffer Type (Adaptive), Jitter Buffer Length (Medium), and Ring Timeout (60). A 'NOTE' section on the right provides instructions for Basic, Codecs, and Advanced parameters.

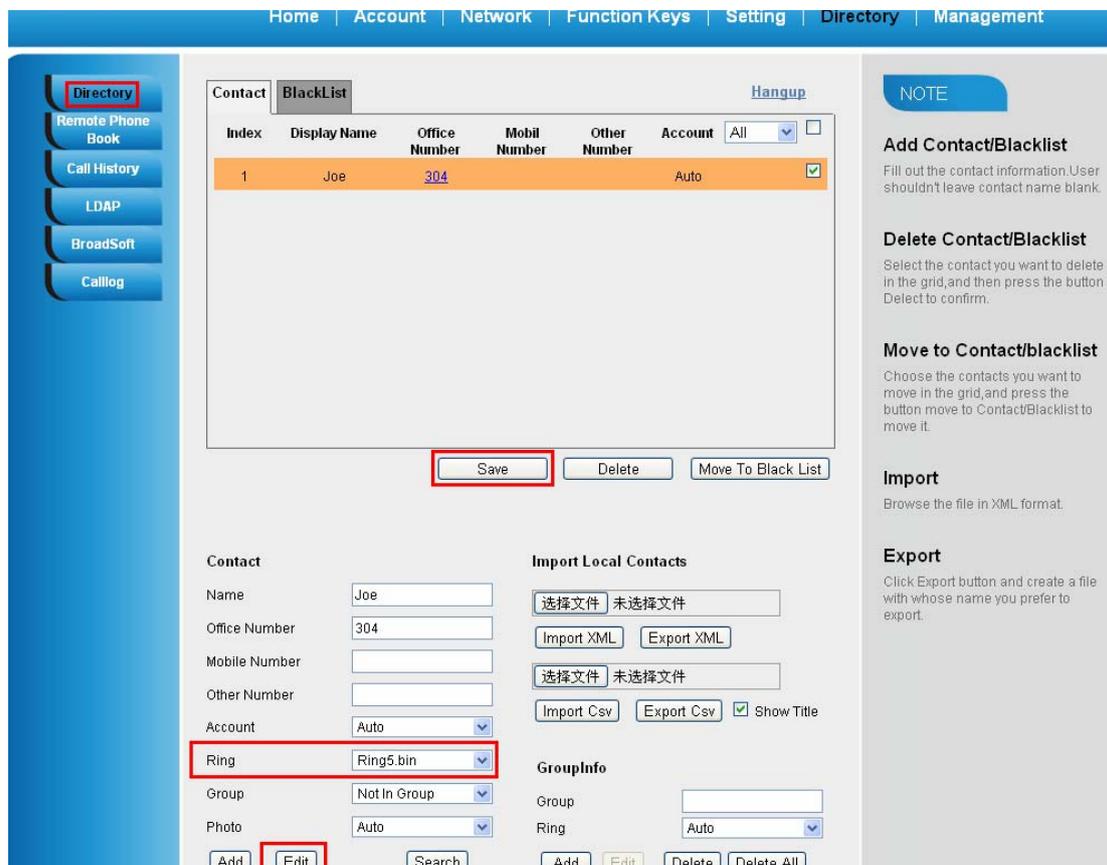

### To configure Distinctive Ring Tone via Phone Interface

1. Press Directory
2. Select the target contact
3. Press Detail soft key to edit the contact.
4. Press  and  to select the wanted Ring Tone for the contact
5. Press Save soft key to save the contact.

**To configure Distinctive Ring Tone via Web Interface**

1. Directory → Directory → Contact
2. Choose the Ring Tone you want to use.
3. Click  →  to save the configuration.

2. Press  or transfer soft key during the conversation, the call is on hold now.
3. Press BLF key then realize blind, attended and Semi-Attended Transfer.

## Call Conference

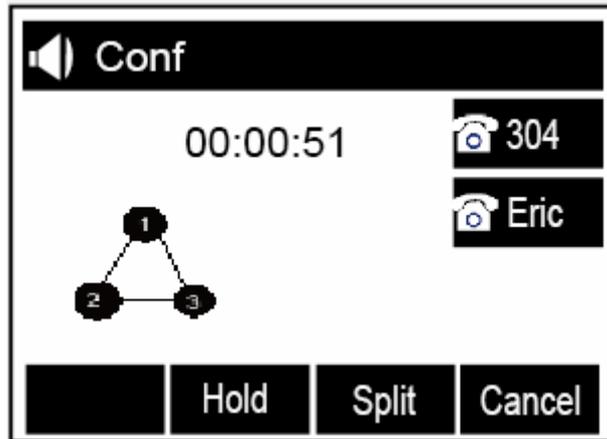

This IP Phone supports up to 5-way conference.

### 5-way conference

1. Assuming that call party A and B are in conversation. A wants to bring C, D and E in a conference
2. A press line 2 key, the call is placed on hold.
3. A enter the number of C and then press send soft key or .
4. C answering the call.
5. A press  or the conference soft key, then A, B and C are now in a conference.(and now this is **3-way conference**)
6. A press line 3 key, the current 3-way conference is placed on hold.
7. A enter the number of D and then press send soft key or .
8. D answering the call.
9. A press  or the conference soft key, then A, B, C and D are now in a conference.(and now this is **4-way conference**)
10. A press line 4 key, the call is placed on hold.
11. A enter the number of E and then press send soft key or .
12. E answering the call.
13. A press  or the conference soft key, then A, B, C, D and E are now the **5-way conference**

is built.

14. A end the call, the conference is finished.

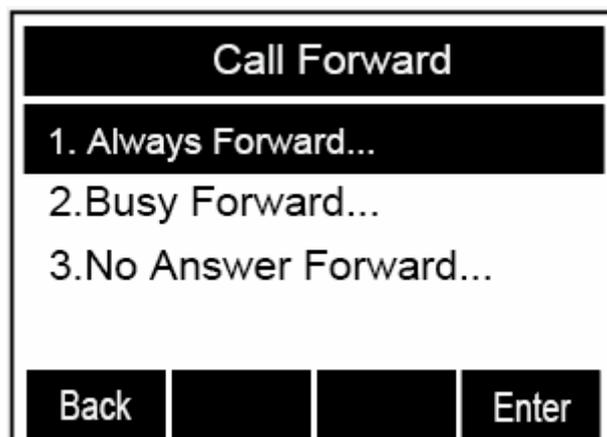

**Note:**

1. If C does not answer the call, A can back to continue the conversation with B;
2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B conversation continues.
3. The conference feature is not available on all servers. For more information, contact your system administrator.
4. To realize the 5 way conference, the line should be all available.
5. Press  to get all parties information.

## Call Forward

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward

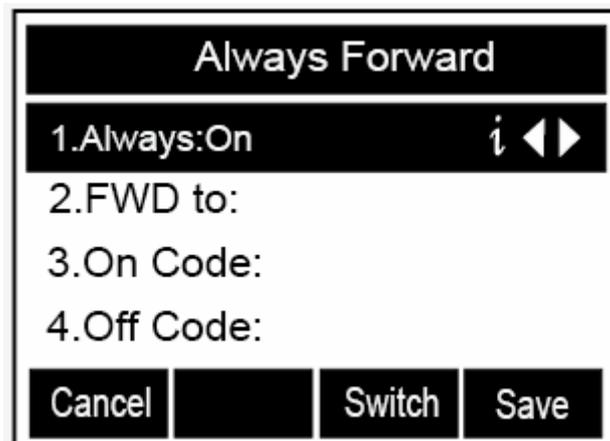

**To configure static forward**

### To configure always forward

With this feature, all incoming calls will forward immediately to configured number.

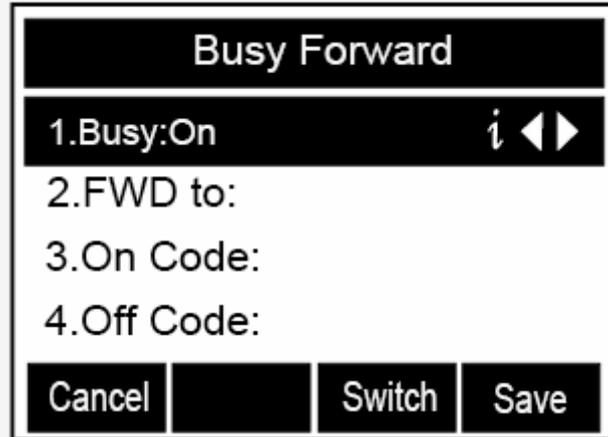

1. Press Menu → Features → Call forward → Always Forward.
2. Press  and  or press  to select the enable choice
3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

### To configure busy forward

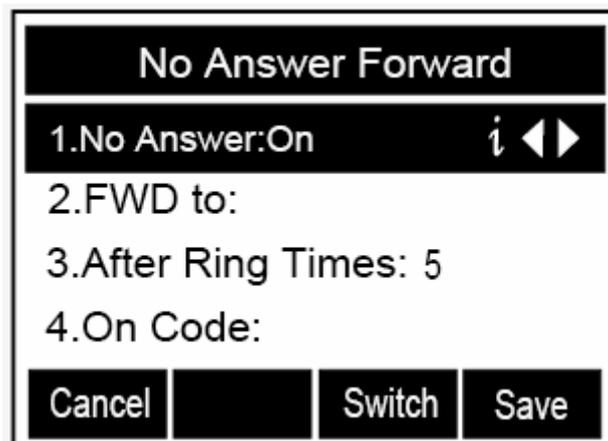

With this feature, the incoming calls are immediately forwarded if the phone is busy.

1. Press Menu → Features → Call forward → Busy forward.
2. Press  and  or press  to select the enable choice.
3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

**To configure no answer forward**

No Answer Forward: Incoming calls are forwarded if not answered after some time.

1. Press Menu → Features → Call forward → No answer forward.
2. Press  and  or press  to select the enable choice
3. Enter the forward to number and on code (optional), off code (optional).
4. Press  or Save soft key to save the configuration.

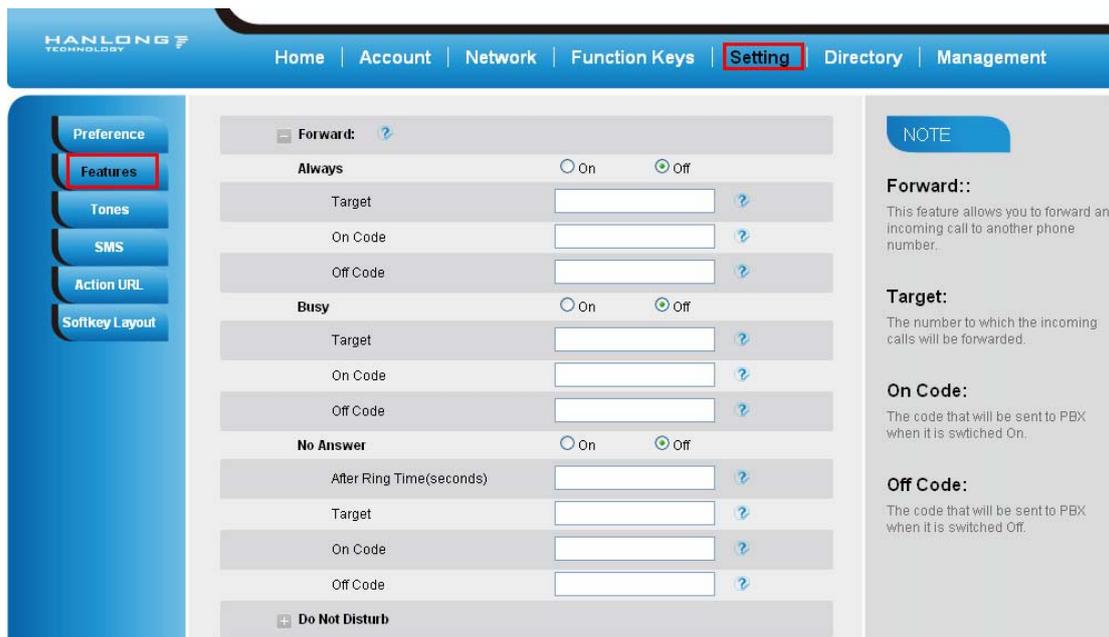

When the Forward feature is enabled, the Forward Icon will display on Top of the LCD.

**To configure Forward via Web Interface**

1. Setting → Features

2. Click On for the Always/Busy/No Answer
3. Fill the Forward to Number
4. (Optional) fill the on/off code
5. Click  to save the configuration

The screenshot shows the 'Setting' page in the web interface. The 'Setting' tab is highlighted in the top navigation bar. On the left sidebar, the 'Features' menu item is selected. The main content area is titled 'Forward:' and contains three sections: 'Always', 'Busy', and 'No Answer'. Each section has radio buttons for 'On' and 'Off' (with 'Off' selected), and input fields for 'Target', 'On Code', and 'Off Code'. A 'Do Not Disturb' section is partially visible at the bottom. On the right, a 'NOTE' section provides instructions for each feature: 'Forward:', 'Target:', 'On Code:', and 'Off Code:'.

### To cancel the forward feature via Phone Interface

1. Option 1: To press the  key to disable the forward feature.
2. Option 2: Press Menu → Features → Call forward → Always/Busy/No answer Forward  
 Press  and  or press  to select the disable choice  
 Press  or Save soft key to save the configuration.

### To cancel the forward feature via Web Interface

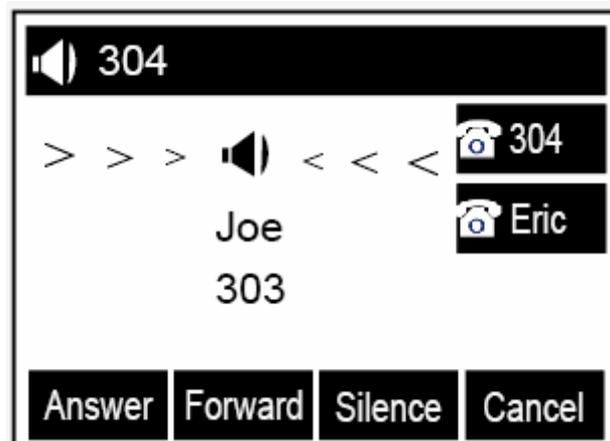

1. Setting → Features
2. Click Off for the Always/Busy/No Answer

3. Click  to save the configuration

### To configure dynamic forward

#### Forward an incoming call during the ringing.

1. When the phone is ringing, press Forward soft key.
2. Enter the forward number.
3. Press  or press the send soft key, then the call is forwarded.

**Note:**

If the Programmable Key or line key is set as BLF, when an incoming call ringing, press this BLF key directly to realize the dynamic forward.

## Call Return

This feature allows you to dial the last phone call you received.

#### To configure the Call Return via phone interface

1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1 (for example)
2. Select the wanted Line or Memory key.
3. Press  and  or press  key to select the Key Event in the type field.
4. Press  and  or press  key to select the Call Return.

5. Press  or Save soft key to save the configuration

**To configure the Call Return via Web interface**

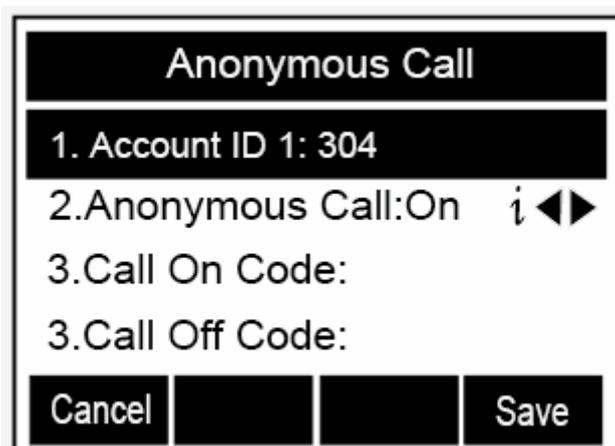

1. Click Function keys → Line key.
2. Select the desired Line key and select Call Return in the Type.
3. Click the  to save the configuration.

## Hide Caller ID

Just enable the anonymous call feature, you can set your ID do not appear on the other phone that you called.

**To configure anonymous call**

1. Press Menu → Features → Anonymous Call

### To set Factory Reset via web interface

Click Management → Upgrade

Click  and then confirm the setting.

The screenshot shows the web interface of a Hanlong Technology device. The top navigation bar includes Home, Account, Network, Function Keys, Setting, Directory, and Management (highlighted with a red box). The left sidebar contains Password, Upgrade (highlighted with a red box), Auto Provision, Configuration, TLS Certs, Restart, and Reboot. The main content area displays the 'Upgrade' section with the following options:

- Image Version
  - Major Version: IMG-1.0.3.59(2013-12-14 17:19:00)
  - Minor Version: IMG-1.0.3.56(2013-10-14 16:27:00)
- Reset To Factory:
- Pcap Feature:
- Img Firmware Upgrade:  未选择文件

A 'NOTE' section on the right provides additional information:

- Image Version:** Show the information of the two system image version .
- Reset To Factory :** Reset all the settings of the phone to default configurations.
- Restart:** one simple operation for restart the voip application.

## Upgrade

To upgrade software, this phone can be configured with a TFTP server where the new code image is located. The TFTP upgrade can work in either static IP or DHCP mode using private or public IP address. It is recommended to set the TFTP server address in either a public IP address or on the same LAN with the phone.

### To configure the TFTP server via the Web configuration interface

Input the admin password to enter the configuration screen. From there, enter the TFTP server

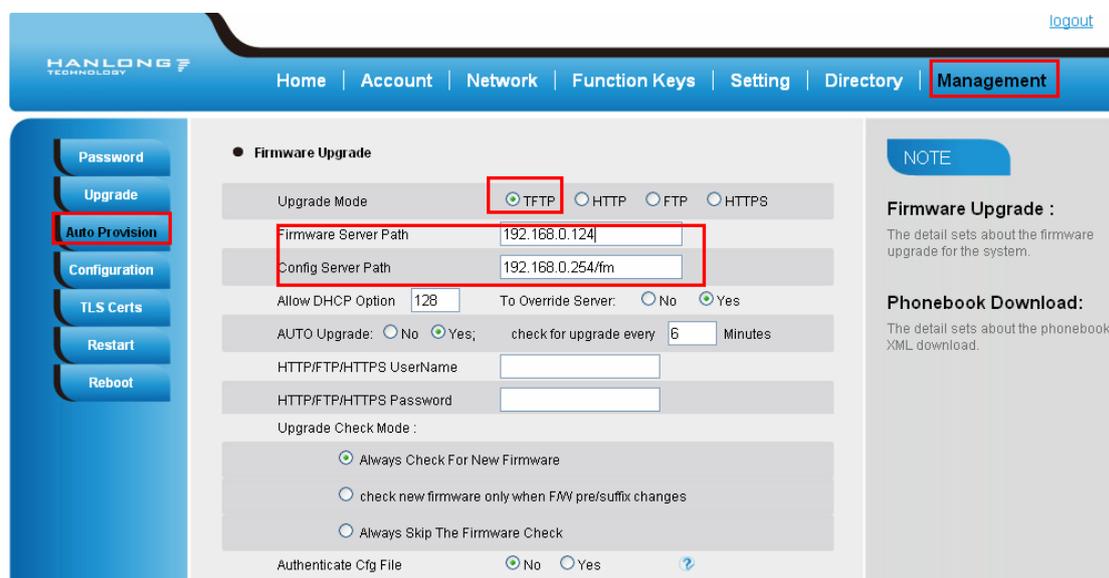

address in the designated field towards the bottom of the configuration screen.

Once the TFTP server is configured, please power cycle the phone.

TFTP process may take as long as 1 to 2 minutes over the Internet or just 20+ seconds if it is performed on a LAN. Users are recommended to conduct TFTP upgrade in a controlled LAN environment if possible. For those who do not have a local TFTP server, Hanlong provides a NAT-friendly TFTP server on the public Internet for firmware upgrade. Please check the Service section of Hanlong's Web site to obtain this TFTP server's IP address.

## Directory to configure local TFTP

1. Unzip the file and put all of them under the root directory of the TFTP server.
2. The PC running the TFTP server and the UC IP PHONE should be in the same LAN segment.
3. Go to File -> Configure -> Security to change the TFTP server's default setting from "Receive Only" to "Transmit Only" for the firmware upgrade.
4. Start the TFTP server, in the UC IP PHONE's web configuration page.
5. Configure the Firmware Server Path with the IP address of the PC.
6. Update the change and reboot the unit.

The screenshot shows the 'Management' section of the Hanlong IP Phone web interface. The 'Auto Provision' menu item is highlighted in red. The 'Firmware Upgrade' section is active, showing the following settings:

- Upgrade Mode:  TFTP,  HTTP,  FTP,  HTTPS
- Firmware Server Path:  (highlighted in red)
- Config Server Path:  (highlighted in red)
- Allow DHCP Option:
- To Override Server:  No,  Yes
- AUTO Upgrade:  No,  Yes; check for upgrade every  Minutes
- HTTP/FTP/HTTPS UserName:
- HTTP/FTP/HTTPS Password:
- Upgrade Check Mode:
  - Always Check For New Firmware
  - check new firmware only when FW pre/suffix changes
  - Always Skip The Firmware Check
- Authenticate Cfg File:  No,  Yes

## NOTES:

When Hanlong IP Phone boot up, it will send TFTP or HTTP request to download configuration files, there are two configuration files, one is "cfg.txt" and the other is "cfg001fc1xxxxxx", where "001fc1xxxxxx" is the MAC address of the phone. These two files are for initial automatically

provisioning purpose only, for normal TFTP or HTTP firmware upgrade, the following error messages in a TFTP or HTTP server log can be ignored.

Download and install a free TFTP or HTTP server to the LAN to perform firmware upgrades. A free Windows version TFTP server is available:

[http://www.solarwinds.com/products/freetools/free\\_tftp\\_server.aspx](http://www.solarwinds.com/products/freetools/free_tftp_server.aspx).

## To upgrade manually via the Web configuration interface

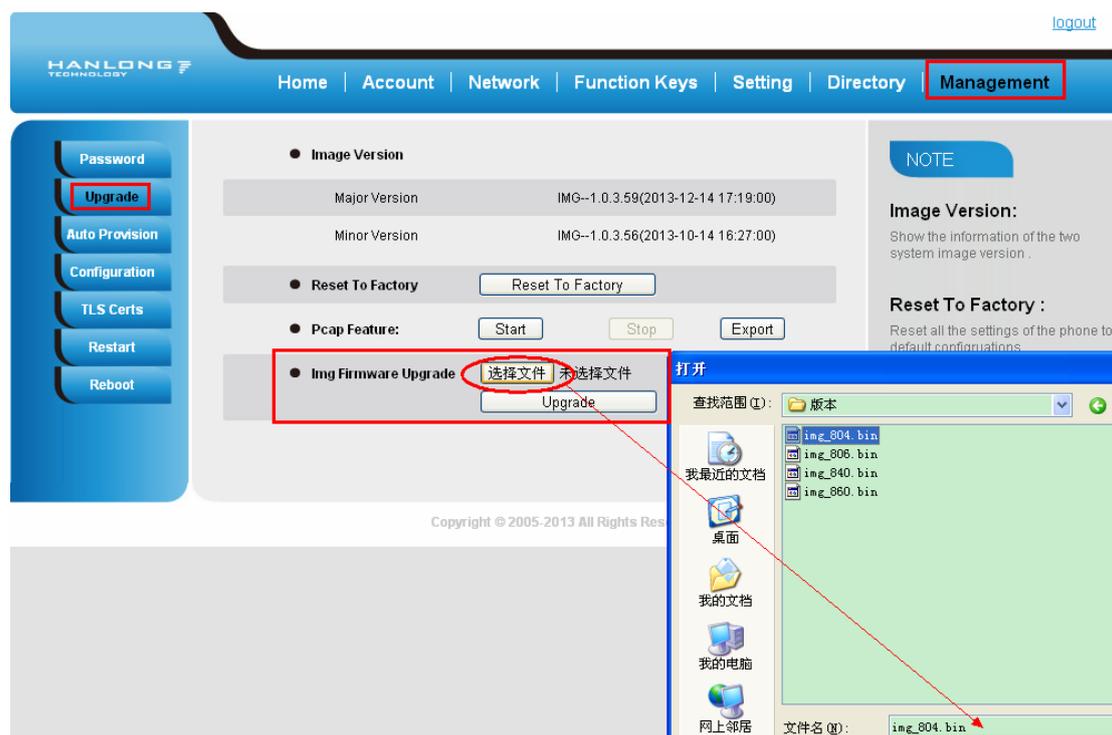

Download the firmware.

Click Management → Upgrade

Click Brower or the blank.

Select the firmware and then click 

Restart.

The screenshot displays the HANLONG web configuration interface. The top navigation bar includes 'Home', 'Account', 'Network', 'Function Keys', 'Setting', 'Directory', and 'Management' (highlighted with a red box). The left sidebar contains 'Password', 'Upgrade' (highlighted with a red box), 'Auto Provision', 'Configuration', 'TLS Certs', 'Restart', and 'Reboot'. The main content area shows the 'Image Version' section with 'Major Version' and 'Minor Version' details. Below this is the 'Reset To Factory' section with a 'Reset To Factory' button. The 'Pcap Feature' section has 'Start', 'Stop', and 'Export' buttons. The 'Img Firmware Upgrade' section is highlighted with a red box and contains a '选择文件 | 未选择文件' button and an 'Upgrade' button. A file selection dialog is open, showing a list of files: 'img\_804.bin', 'img\_808.bin', 'img\_840.bin', and 'img\_860.bin'. The 'img\_804.bin' file is selected, and a red arrow points from the '选择文件' button to the selected file. The dialog also shows '桌面', '我的文档', '我的电脑', and '网上邻居' as search locations. The '文件名(N):' field contains 'img\_804.bin'.

## Troubleshooting

### Why is the phone LCD screen blank?

1. Ensure your phone is properly plugged into a functional AC outlet.
2. Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
3. If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
4. If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
5. Check that the power LED is on to ensure the phone is powered on.

### Why does the phone display "Network Unavailable"?

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.
- Contact your system administrator for more information.

### Why can't I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to [Phone Installation](#).
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.
