

# MAX BR1 cellular router

## Industrial-Grade M2M 4G LTE Router

**PEPWAVE**  
Broadband Possibilities

### Built to Last. First in Mobile Uptime.

The Pepwave MAX BR1 is a rugged, ready-for-anything M2M connectivity solution that powers unparalleled uptime and dependability in mobile command, first response, surveillance, banking, retail, and other deployments. Featuring Automatic Failover between fixed and mobile links, IPsec VPN Failover, built-in 802.11n Wi-Fi and 4G LTE/3G modems, and SpeedFusion™ persistent session roaming, the MAX BR1 keeps critical voice, data, and video streams flowing fast, without interruption, wherever your work takes you.

#### Automatic WAN Failover.

MAX BR1 automatically switches between Ethernet WAN, Wi-Fi as WAN, and 4G LTE/3G links to keep your WAN up and running at all times.

#### IPsec VPN Failover.

MAX BR1 automatically re-establishes your IPsec VPN connection on lower priority link when your primary WAN fails. Your VPN stays up, and you stay seamlessly connected.

#### Embedded 4G LTE or World-Mode 3G Modem.

Cut complexity and cost with a built-in 4G modem that supports Verizon or AT&T 4G LTE network. The BR1 is also available with embedded world-mode 3G modem that supports both CDMA and GSM for all U.S. carriers.

#### Redundant SIM Slots with Data Overage Protection.

The BR1 saves you money with a bandwidth allowance monitor that switches SIMs when you're close to a data cap. Dual SIM slots also eliminate 3G network dead spots by automatically switching carriers for ultra-reliable, consistent mobile connections.

#### Industrial Durability.

Built to withstand temperatures from -40° to 65°C and featuring ESD/surge protection for all ports, the MAX BR1 is designed for worry-free performance wherever your work takes you.

#### Versatile Input Voltage. Redundant Power Supply.

The MAX BR1 supports a wide input range of 10V – 30V DC. It also keeps the current and your work uninterrupted with a built-in terminal block that can be used in tandem with the BR1's DC connector to give you high availability power you can depend on.

Works With

And 200+ USB Modem from Worldwide Carriers

#### SpeedFusion™ Hot Failover.

Thanks to hot failover powered by SpeedFusion technology, failover between fixed and mobile links is completely seamless. With other technologies, fixed/mobile failover terminates existing connections, creating costly downtime. With SpeedFusion hot failover, you won't miss a beat when your MAX BR1 switches between connections.

#### Bridge/IP Pass-Through Mode.

Bridge/IP pass-through mode transparently passes your cellular public IP to your Ethernet LAN, simplifying your deployments alongside existing equipment.

#### Switchable 802.11n Wi-Fi as WAN or AP.

Built-in 802.11n Wi-Fi lets you connect to a Wi-Fi source as WAN. Switchable to Wi-Fi AP, the MAX BR1 also lets you deploy a fast, secure, and reliable Wi-Fi hotspot anywhere.

#### Dual Ethernet LAN Ports.

Dual Ethernet LAN ports mean you don't have to worry about external switches and power supplies or unnecessary maintenance and setup hassles, even if your work requires two LAN ports.

#### Central Management.

Cloud and local administration options let you manage all your mobile outposts from one intuitive interface.

#### GPS Location Service.

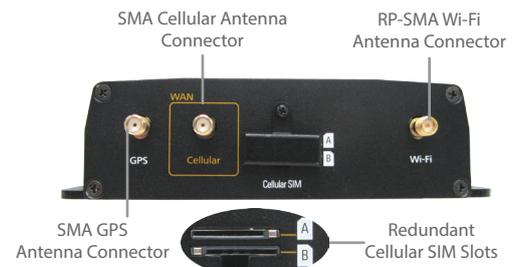

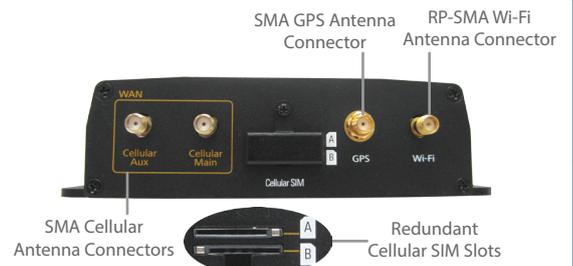

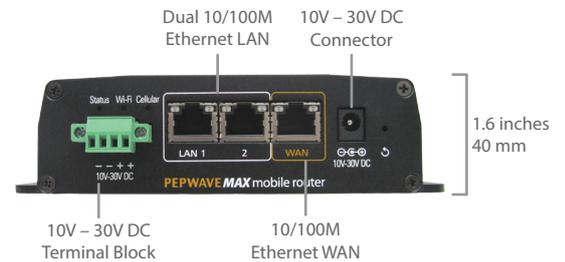

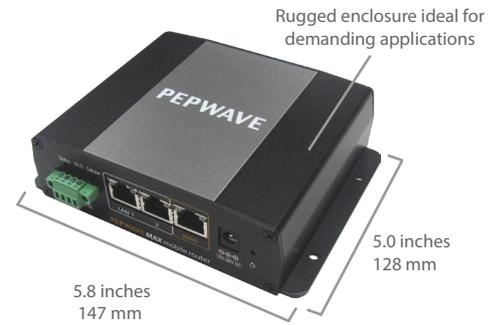

Built-in GPS lets you keep tabs on fleet vehicles wherever they may be. Easy to interface with external GPS systems, the MAX BR1 allows you to maximize resources and team coordination while improving safety and productivity.

# Specifications

## MAX BR1

WAN Interface	1x 10/100M Ethernet Ports 1x Embedded Cellular Modem with Redundant SIM Slots
LAN Interface	2x 10/100M Ethernet Ports 802.11b/g/n 150 Mbps Wi-Fi Access Point
Wi-Fi AP Operating Frequency	2412 – 2472 MHz
Router Throughput	100Mbps
Number of SpeedFusion Peers	2
PepVPN/SpeedFusion Throughput (no encryption)	60Mbps
PepVPN/SpeedFusion Throughput (256-bit AES)	20Mbps
Cellular and GPS Antenna Connector	2x SMA Cellular Antenna Connectors (4G LTE) 1x SMA Cellular Antenna Connector (3G) 1x SMA GPS Antenna Connector
Wi-Fi Antenna Connector	1x RP-SMA Wi-Fi Connector
Power Input	Device: 10V – 30V DC AC Adapter: AC Input 100V – 240V, DC Output 12V Terminal Block: 10V – 30V DC
Power Consumption	16W (max.)
Dimension	5.8 x 5.0 x 1.6 inches 147 x 128 x 40 mm
Weight	0.96 pound 435 grams
Operating Temperature	-40° – 149°F -40° – 65°C
Humidity	15% – 95% (non-condensing)
Certifications	FCC, CE, E-Mark, RoHS
Warranty	1-Year Limited Warranty

For the most updated specifications, please refer to our website: <http://www.pepwave.com/max-mobile-router/>.

## Features

**WAN**  
Support for PPPoE, Static IP, DHCP  
WAN Link Health Check  
Intelligent Failover  
Bandwidth Allowance Monitor  
Support for Dynamic DNS services

**LAN**  
DHCP Server for LAN Clients  
Extended DHCP Options  
DHCP Reservation  
DNS Proxy for LAN Clients

**Complete VPN Solution**  
PepVPN  
Site-to-Site VPN  
Hot Failover  
256-bit AES Encryption  
Pre-shared Key Authentication  
Dynamic Routing  
IPsec VPN (Network-to-Network)

**Advanced QoS**  
User Groups  
Individual Bandwidth Limit  
Application Prioritization  
SIP, HTTPS, VPN QoS  
Custom Application QoS

**Networking**  
IP Passthrough  
NAT and IP Forwarding  
Static Routes  
Port Forwarding  
Many to One, One to One NAT  
NAT Pool  
SIP ALG, H.323 ALG  
UPnP, NAT-PMP  
WINS Server

**Security**  
Stateful Firewall  
DoS Prevention

**Device Management**  
Web Administrative Interface  
Command Line Interface  
InControl Cloud Management  
Router Utility Mobile App  
Email Notification  
Active Client & Session Lists  
Bandwidth Usage Statistics  
Web Reporting Services  
Syslog Service  
SNMP v1, v2c and v3

**Certification**  
FCC, CE, E-Mark, RoHS

## Product Ordering Information

### MAX BR1

Product Code	Carrier	Description
MAX-BR1-LTE-V-T	Verizon	Embedded 4G model supporting Verizon's 4G LTE network and providing automatic fallback to Verizon 3G as needed.
MAX-BR1-LTE-A-T	AT&T	Embedded 4G model supporting AT&T's 4G LTE network and providing automatic fallback to AT&T 3G as needed.
MAX-BR1-LTE-E-T	4G LTE/HSPA+ (EU)	Embedded 4G model supporting 4G LTE for EU and worldwide GSM carrier. Technologies and frequency bands supported: 4G LTE (800/900/1800/2100/2600 MHz); UMTS/WCDMA/HSPA+ (900/2100 MHz); EDGE/GPRS/GSM (900/1800/1900 MHz).
MAX-BR1-T	Worldwide	Embedded 3G model supporting the global networks of all mobile carriers, including Verizon, AT&T, Sprint, and worldwide GSM carrier. Technologies and frequency bands supported: UMTS/HSDPA/HSUPA (800/850/900/1900/2100 MHz); EDGE/GPRS/GSM (850/900/1800/1900 MHz); CDMA 1xRTT/EV-DO (800/1900 MHz).

### Add-on Feature

Product Code	Feature Pack	Description
MAX-BR1-ADV	Advanced Feature Pack	Package includes a software license key for Advanced Car-Fi Roaming <sup>1</sup> and IPsec X.509 Certificate Support

<sup>1</sup>For more information about Advanced Car-Fi Roaming, please refer to our website: <http://www.pepwave.com/products/carfi/>.
